Education

Stevens Institute of Technology

Bachelor of Science in Computer Science

September 2020 - May 2024

Summary

Junior Software Engineer with experience building and deploying full-stack web applications using React, Node.js, Express, MongoDB, and TypeScript/JavaScript. Skilled in REST APIs, authentication, cloud deployment, Docker, and responsive UI development. Seeking an entry-level software engineering role focused on building scalable web applications and backend services.

Work Experience

Jasmin

Full-Stack Software Engineer

Hoboken, NJ

September 2023 - May 2024

- Developed a therapist-matching web application using React.js, Node.js, and JavaScript, reducing load time by 40% through enhanced API calls
- Implemented Firebase and MongoDB for authentication, decreasing login failures by 35% and reducing authentication time by 50%
- Created an AI chatbot to provide quicker therapy advice using the Gemini API, increasing user experience
- Utilized the Whereby API to implement a video call feature, increasing user-therapist communications

Code Ninjas Cupertino

Code Tutor

Cupertino, CA

April 2025 - Current

- Instructed students across diverse age groups in JavaScript fundamentals, utilizing Microsoft MakeCode Arcade, Minecraft Education, and Unity to facilitate interactive and engaging learning experiences
- Mentored beginners with no prior coding experience to build their games
- Conducted code reviews and debugged student code to ensure functionality, adherence to best practices, and optimization of performance for over 60 students in one day

Projects

Dungeons 4 Dummies (<https://www.dungeons4dummies.com/>)

Full Stack Web Developer

San Jose, CA

September 2025 - Current

- Gmail Authentication and Image storing using Firebase
- Deployed application using AWS EC2 instance and created DNS using AWS Route 53
- Configured NGINX reverse proxy and HTTPS/TLS
- Containerized frontend and backend services with Docker
- Built a proprietary JSON data library from thousands of pages of D&D source material
- Validated REST APIs in Postman, ensuring reliable CRUD operations and accurate frontend-backend integration.

Profile Website (<https://jaejang02.github.io/My-Website/>)

Front-End Developer

San Jose, CA

February 2025 - Current

- Developed a public portfolio website using React and GitHub Pages, showcasing projects and experience in a technical environment
- Enhanced UI with React-Bootstrap, lowering bounce rate by 20% and increasing recruiter engagement by 50%

Technical Skills

Languages: Python, JavaScript, TypeScript

Frameworks: React, Node.js, Express.js, Tailwind CSS, Shadcn/UI, Material UI, Bootstrap

Databases/Cloud: MongoDB, Redis, Firebase, AWS EC2, AWS Route 53

Tools: Docker, NGINX, GitHub Actions, Git, Anime.js, Postman, Bcrypt.js
